### Related Experience

#### University of Texas at Austin Web Development Program

**DND Builder | Repository** <https://github.com/InternetEthan/dnd-builder> |

**Link to Deployed Application:** <https://dnd-builder-8e53886511db.herokuapp.com/>

- Conceptualized and developed a streamlined Character Builder app, empowering users to effortlessly create customized heroes hassle-free.
- Spearheaded UI design with Bootstrap, crafting an intuitive and visually appealing interface that garnered praise from users and contributed to a more interesting and user-friendly application.
- Played a key role in bug fixing for log-in/sign-up processes and routing functionalities, collaborating closely with the team to resolve issues promptly and improve application stability, leading to a decrease in bugs and enhanced user reliability.
- Engineered RESTful API using Node.js & Express.js, MySQL, and Sequelize, facilitating seamless data storage and retrieval processes, which contributed to an increase in application performance and responsiveness.

**QuoteMe | Repository** <https://github.com/charleshuurman/QuoteMe> |

**Link to Deployed Application:** <https://quoteme-1b7p.onrender.com/>

- Spearheaded the development of QuoteMe, a groundbreaking web application aimed at fostering emotional well-being through personalized affirmations, mindfulness experiences, and private journaling, resulting in a perfect score on the assignment and continuous development.
- Played a pivotal role in back-end database implementation and optimization, collaborating with team members to streamline data storage and retrieval process, resulting in a reduction in database query response times and enhanced overall application performance.
- Implemented dynamic emotion charts using Chart.js, providing users with insightful visualizations of their emotional states over time, contributing to a more user-friendly and helpful application.
- Technologies used were MongoDB, React, Apollo/GraphQL, Jsonwebtoken(JWT), Stripe, Node/Express, DaisyUI / TailWind CSS, Bcrypt, Axios, Vite, OpenAI, Chart.js, react-chartjs-2, Pixabay api to fetch pictures related with emotion.

**Bar Crawler | Repository** <https://github.com/acantu9/team-5-project> |

**Link to Deployed Application:** <https://acantu9.github.io/team-5-project/>

- Engineered and deployed an innovative web application empowering users to effortlessly customize personalized bar crawls based on location or preferences, leading to an increase of accessibility and diversity of customization as well as perfect score on my first group project.
- Orchestrated seamless integration of vital APIs including OpenWeather, Google Maps, and Unsplash,

delivering real-time weather updates, precise location-based services, and captivating imagery, resulting in an enhancement in user satisfaction.

- Demonstrated expertise in UI/UX design by implementing advanced CSS frameworks like Tailwind and DaisyUI, resulting in improvement in page load times and a boost in overall user satisfaction.

## Experience

### **Russell's Bakery**
